

CV

Personalinfo:

Name: Sander M. Johansen

Born: 9 august, 1984

Marital status: single

Living area: Bærum

E-mail: sanderm@gmail.com

Tlf: +47 41844844

Key competence

- 4 years of Computer Science at university as lector and 9 years industry practical experience.
- Understanding of Big Data (elasticsearch, neo4j), PaaS (cloudfoundry, openshift), IaaS (openstack, amazon aws)
- Some experience with puppet and cfengine for automating systems
- Experience with Centos and Debian/Ubuntu Linux for an ISP environment
- Very good experience with perl/php/python/mysql/postgresql (high and low level languages last page)
- A programmer also with experience within operations, devops and lean oriented.
- Updated on latest trends by going to technical and entrepreneur related events in Oslo
- Expert in figuring out the right set of questions to ask various people in the opensource, security and startup community to be able to learn about a specific piece of technology or problem to reach a higher goal faster.
- Experience with discovering business opportunities and understanding the customer's needs by talking to technical and non technical people, meeting people in win-win situations
- Numerical data modelling in python at the university master level (INF5660 and INF3330)
- Algorithmic modelling in Java from 5 different university courses and Programming of a small commodity compiler in java at the university
- Industry experience with: Cloud architecture, Lean ux, Google tools, Operating system internals programming and usage scripting, File formats, 10+ programming languages, Programming frameworks, Entrepreneur tools, API integrations, Database internals and usage, Virtualization internals and usage, Server infrastructure usage and internals, circuit board logic, entrepreneur (tool, experience and books) (detailed full list at end)

Work experience

2017-2021: strategic defence devop at hospital undercover as hobby psychologist PhD

- Cooperation with Hilde Kristine Østgaard (main responsible for Blakstad) and Øyvind Grøn, battle soldier from NASA and the Police under "smn", to figure out if the security department is for the public wealth. Øyvind with the university have assisted in proofreading. I'm battling social economical problems at <http://twitter.com/sanderm> :-)
- Remote work with the fundament to airtable.com and Assisting angelchallenge.com during this

time always helped me going one step further out of my comfort zone, ending in going around and demanding change here and there.

- My motto is, having a story to tell always makes people loosen up because I'm not a normal geek;-)

2009: DevOps Engineer Manager, Hosting Architecture, Active 24 - in Visma/Mamut

- Currently in a career change leave from this company, because of military since January 2016
- Writing RFC change requests due to high uptime requirements
- Programming of a continuous deployment tool for WordPress webpages in Python with Git API, so outsourcing of code and graphical updates with an external web agency became trivial. Published the code on [GitHub.com/sanderm](https://github.com/sanderm)
- Changing of an order process in JavaScript to support Google Analytics eCommerce to get more accurate statistics.
- Market research which made us use the cloud tools MailChimp (mailing list), Trello (project management), HipChat (persistent group chat)
- Launch of a self-integrated and hosted product which gained 6000 customers equals maybe 1.2 million in monthly new revenue
- Upgrading non-trivial load balanced Linux hosting cloud architecture with benchmarking and testing upfront with 20'000 customers with only minutes in downtime
- Backend programming and sysadmin of integrations with Python, Bash, Perl, PHP, C#, MSSQL and MySQL

2010-Now:

Business improvement analyst Startup Norway/startup Weekend Oslo

- Startup Norway is a national organization which works both global and local which runs a broad range of entrepreneur-related events in Oslo, Bergen, Stavanger and Trondheim. We use these events to facilitate and to stimulate the startup communities to grow, and create more and more value over time. We thank our over 100 partners and we showcase many hundreds of startup companies and events organized by others in the community worth attending.
- Startup Weekend is a global network of passionate leaders and entrepreneurs on a mission to inspire, educate, and empower individuals, teams and communities. The events are weekend-long, hands-on experiences where entrepreneurs and aspiring entrepreneurs can find out if startup ideas are viable. On average, half of Startup Weekend's attendees have technical or design backgrounds, the other half have business backgrounds. Accomplishments: Winner of one event, Leader of one event, social media marketing, newsletter marketing, business developer, sponsorship meetings, promotion through public speaking in small groups.

Backend programming and sysadmin with Python and MySQL

2006 - 2009:

Consulting and entrepreneur as a software programmer at Pastoor Invest

- Programming a web TV solution for publishing flash videos on websites. The solution is currently used by kingsize.no, the Nordic's biggest hip-hop magazine.
- [Airline Campaign site](#) for [Wideroe](#) in cooperation with [Naked](#) and [Bloc.no](#). Integrated with uploading and encoding (with ffmpeg) of video through MMS.
- [Bluetooth application](#) written in Python for file downloading to mobile devices using [OBEX](#), in cooperation with [EMI Norway](#) and [kingsize.no](#).
- Doing financial accounting in Excel and delivering it manually to altinn.no
- Backend programming and sysadmin with Python, C, PHP and MySQL

2005 - 2006:**Consulting as a backend ecommerce programmer at emballasje.no**

Programming an ecommerce portal from scratch with management module and specialized parameterized product search functionality written in php/postgresql. I did this project with another programmer, where I was the architect and lead programmer. This makes it simple for grocery stores all over Norway to easily order the right size of fruit packaging in bulk.

Backend programming and sysadmin with php and Postgresql

2002 – 2008:**Consulting as a devop lector at Dønski senior high school.**

Implementation of a Linux gateway and perl programming of an webmin/squid module customized to allow/deny internet access to classrooms in a userfriendly way. This was daily used in production by around 100 teachers and 550 students over many years.

Backend programming and sysadmin with perl and debian linux. This career hop made me align my education with university of Oslo, also with hundreds of patents registered under oslomet university.

Education

2007

20 ECTS credits on master level in informatics, University Of Oslo

2004 - 2006

Bachelor in Informatics, Included several master level courses, University Of Oslo

2001 - 2003

Senior high school with specialization in databases, programming, and accounting, Donski senior high school.

Courses

Master level, University of Oslo:

INF5660 - Advanced problem solving with high level languages (Perl/Python/C)

INF4151 - Operating systems (C/ASM) (20 ECTS credits)

INF3190 - Data communications (C)

INF3330 - Problem solving with high level languages (Perl/Python/BASH)

INF3110 - Programming languages (ML/Java)

INF3100 - Database systems (SQL/Oracle)

Bachelor level, University of Oslo:

INF2100 - Programmingproject(Java)

INF1400 - Digital TechnologyINF1070 - Computer architecture (C/ASM)

INF1060 - Introduction to Operating Systems and Data Communications (C)

INF1050 - Systems Development

INF1040 - Digital Representation

INF1020 - Algorithms and data structures (Java)

INF1010 - Object Oriented Programming (Java)
INF1000 - Introduction to object-oriented programming (Java)
MAT1030 - Discrete mathematics
MAT1000 - Mathematics for applications I

Language

Norwegian, fluent

English, very good written and oral.

IT Technologies:

Ordered both horizontally and vertically by significance (best knowledge first)

Business:

cloud architecture, devops, lean canvas, business model canvas, Lean ux, growth hacking

Google:

Forms, Spreadsheets, Keep, Docs, Analytics ecommerce, Gplus, Video hangouts, Video hangouts apps.

Operating systems:

Debian, centos, Raspbian, Suse, Chromeos, Windows 7, Linux kernel compilation, Own made simple operating system

Format understanding:

HTML, CSS, Json, csv, XML, pdf, latex, png, jpg, gif

Languages:

Bash, Python, PHP, Perl, JavaScript, java, tcl, C, ASM, Ruby, C++, ML (functional), C#, Go

Frameworks:

JQuery, firebase, Rails, Django

Tools:

Git, Wordpress, woocommerce, trello (project management), hipchat (persistent communication), mailchimp (mailinglist), eventbrite (event management), Mixpanel (lean ux), Sass, Less, imagemagic (image manipulation)

Linux tools:

Apache, NFS, FTP, LDAP, Debian packagemanager, varnish vcl rules, puppet, cfengine, nginx, ffmpeg,

API integrations:

git, google analytics ecommerce, google hangout, vmware, openstack, openshift, sms-gateway

Databases:

Mysql, Postgresql, postgres, firebase, sqlite, elasticsearch, neo4j, Oracle, mssql

Virtualization:

Vmware, Hyper-V, XenServer, Openstack, openshift, google appengine, amazon aws, cloudfoundry

Infrastructure:

Dell San, Dell bladecenter/Servere, IBM SAN, Palo Alto firewalls, F5 / BIGIP load balancers,

Non university books read:

ReWork by Jason Fried, Running Lean by Ash Maurya, Hello Android By Burnette, continuous delivery by Jez Humble (some), Design patterns (some), Business model generation by Osterwalder (some)
